## Summary

I am a React frontend developer with 2+ years of experience, I have a strong understanding of React, Next.js and its associated libraries and tools like Redux, material ui, tailwind CSS etc. I am skilled at creating robust, maintainable, and scalable frontend applications using JavaScript and web development fundamentals.

## Work Experience

**software developer intern, MilestoneOs (Internship), Noida**

January 2021 - June 2021

- Learn basics of web development concepts.
- Build some basic and responsive websites using HTML, CSS and Javascript.

**Frontend developer, Antino Labs private limited**

November 2021 - Present

Project 1: [MY3dmeta B2B platform](#)(client-my3dmeta)

- Created B2B platform using Next.js
- Used Mix-pannel and mail chip for batter tracking of app.
- Used Tailwind CSS for styling.
- Used Redux-toolkit for state management.
- Created globalization using i18-Next library for supporting different languages across the globe.'
- Worked on store and create custom asset module in which user can see the dynamic invoice and search in store with different keywords and names.
- Worked on onboarding flow, profile settings and managed complex forms with proper validation using react-hook-form and yup.
- Make custom hook and reusable components with clean code to reduce file size.

Project 2: [Top faculty Job recruitment and consultancy](#)(client-Top-faculty)

- Build dynamic onboarding form for user and organization with proper validation using react-hook-form and yup.
- Build job portal for user and used redux-thunk for state management.
- Build responsive design and flow for user and admin where one can create post video, photos, likes comments etc.

Project 3: [Pluto Tv\(USA\)](#)(client-Pluto-tv)

- Worked on TTS and localization (react-i18n library).
- Created some custom hooks and video performance issue bug fixes.

Project 4: [Eggoz Ecommerce and admin panel\(Client Eggoz\)](#).

- Build event calendar inside subscription module in E-commerce.
- Worked on order-management, retailer management system inside admin panel.
- Build responsive ui of admin panel using Material-UI library.

Project 5:Streetlight CMS(client-Bihar gov)

- Created admin panel for control and record data of thousands of streetlights.
- Used Material-UI component library for table, forms and styling.
- Used Redux-toolkit for state management.
- Worked on Activity module with different nested filters enabled.
